

Agility, is a multifaceted company comprised of experts ready to identify and fix all business issues. Our veteran employees include business architects, software engineers, systems developers, accountants, analysts, and content and policy writer-editors. Since 2011, we have provided business process re-engineering and automation, custom front and back-end web development, SharePoint and cloud-solutions implementation, 508 Compliance, Directives, Records and Content Management support, change management and a wide range of accounting services from audit support to technical forensic analysis.

- OUR ACHIEVEMENTS -

We have recovered tens of millions of dollars annually of loss time efficiency through custom application development and process re-engineering.

Success Stories

The U.S. Departments of State and Agriculture faced multiple failures involving three firms over four years to ingest multi-line documents into the USDA system of record. Agility was called in as a teaming partner, and was **able to formulate a solution within ten months.**

Modernizing the US Forest Service, Directives, Records management, public facing sites, and processes. Providing project management, for a complex process making tens of thousands of documents 508 compliant, developing workflows and process for migration and storage of content and records in a final SOR. **Realizing a cost savings of \$6M per year.**

NRCS receive its 1st **Clean Audit opinion** with Agility's team.

Saving jobs

Agility developed a tool for Job Corps in 2017, that recently provided the necessary information, to reverse a decision by the President, Secretary of the USDA and Secretary of DOL, to not eliminate **1,100 jobs** from the US Forest Service, and not close nine vital centers to youth in our country.
